**Product Overview**

Kronoace® is a high-performance, low-emission, composite panel system. It is characterized by its durability, fire resistance, and advanced design. The product is suitable for a wide range of applications, including interior and exterior walls, roofs, and flooring. Kronoace® is manufactured using advanced composite technology that ensures high strength, stability, and resistance to thermal and environmental changes. It is available in a variety of colors and finishes, providing designers with a versatile tool to create unique architectural solutions.

**Design Features**

- **Durability**: Kronoace® panels are designed to withstand extreme conditions, ensuring long-term integrity and minimal maintenance.
- **Fire Resistance**: The panels comply with stringent fire resistance standards, making them ideal for high-risk areas.
- **Energy Efficiency**: Due to its advanced composite structure, Kronoace® offers superior insulation properties, reducing energy consumption in buildings.
- **Aesthetics**: Available in a wide range of colors and finishes, Kronoace® allows for creative expression in architectural designs.

**Application**

- **Interior Walls**
- **Exterior Walls**
- **Roofs**
- **Flooring**
- **Soffits**

**Technical Specifications**

- **Thickness**: 6 mm to 25 mm
- **Weight**: 7 mm - 8 mm
- **Density**: 0.95 g/cm³
- **Water Absorption**: 0.2% max
- **Sound Absorption**: 0.05 Sone

**Environment**

- **Recyclable**: Yes
- **Low Emission**: Yes

**Further Information**

Pairing the natural character of wood with modern materials and forms offers you an almost limitless array of design directions. Kronoart’s Fundamentals are fully aligned with the concept, ranging from dramatic dark decors to light white pine and warm mid tone oaks. Highlight features, bring in contrasts, soften the impact of concrete, add definition and rich grained character – with Kronoart® you can achieve the look without the installation, maintenance and variability issues of wood.

These rugged, elemental decors echo the strength and integrity of traditional materials such as cast iron, stone and steel. They give you the latitude to design striking exteriors of character and real presence, full of texture and raw natural tones. But unlike their original counterparts, these color-fast finishes are very simple to maintain and clean, and exceptionally easy to handle.
